# ECLIPSE XL

With its new HD overlay, improved hardware, firmware and software, and upgraded steering capabilities, the revolutionary and award winning Eclipse™ has been reborn!

The upgraded system can now offer the ultimate in flexibility and stability for 35mm, Imax, 65mm film and digital, Red, Arri Alexa, and many more camera and lens combinations including Panavision's new DXL camera. By once again, partnering with some of the world's most creative and experienced DPs, our engineering team have integrated user functionality with industry defining technology.

At the core of the Eclipse™ XL's superior stability is the patented XR Motion Management™ technology; enabling the most advanced steering, stability and pointing capabilities available on the market.

## ECLIPSE XL SYSTEM FEATURES

- The highest level of stability
- The highest level of reliability
- Unmatched precise and responsive steering
- Three options for the operator and shot:
  - Absolute level horizon
  - Slave to the helicopter
  - Manually steerable roll
- GPS satellite-based camera targeting and steering
- CGI VFX metadata providing GPS latitude, longitude, altitude and UTC timecode together with complete lens and gimbal attitude data
- Ability to look straight down - panning, tilting, and rolling through 90°
