MOTION CONTROL MADE FOR FILM MAKERS....

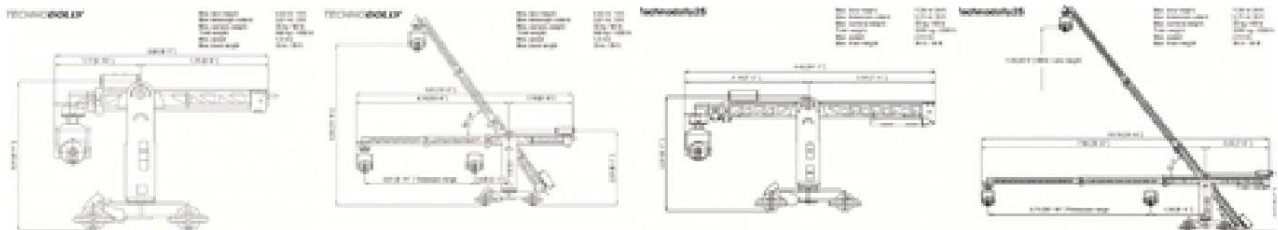

TECHNODOLLY 15

TECHNODOLLY 25

Imagine a camera that moves with the grace of a dancer, capturing every moment with perfect precision. This dream can become a reality with Technodolly, a revolutionary tool designed for filmmakers and content creators. Technodolly offers an incredible solution for motion control, combining the feel of the industry-standard Technocrane workflow with advanced technology to elevate film production to new heights.

First and foremost, Technodolly provides unmatched precision in motion control. The device allows filmmakers to create smooth and dynamic shots, making scenes come alive. For instance, a director can easily achieve complex camera movements that would be nearly impossible to replicate manually. Whether it is a sweeping shot over a breathtaking landscape or a close-up of an emotional moment, Technodolly ensures that every shot is captured flawlessly. This level of precision not only enhances storytelling but also saves time during production.

- 3 Axis S-Head supports a payload of up to 80lbs (Stabilized)
- Wheels or Joystick head controls
- FBX import/export as well as FreeD/Unreal Engine Plugin
- Can be transported through a standard 36"x 80" Doorway
- Keyframe or Live record features
- C-Motion/Preston and lightranger friendly
- Very quiet when in operation
- TechnoDolly25 Allows overslung mode
- 60Ft of Track
